

Crown Confidence Plan

C-5 Series Internal Combustion Models

Crown Equipment Corporation ("Crown") makes this Confidence Plan on C-5 Internal Combustion models.

Crown is so confident the C-5 will perform better and last longer than competitive models, we back it with the Crown Confidence Plan. The Crown Confidence Plan covers all routine planned maintenance at the hour intervals stated in the Planned Maintenance Summary Chart 1 found in the C-5 service and parts manual. This plan is in effect for the first 2000 hours of use (not to exceed 24 months from the installation date of the truck), and will be performed at no charge when the work is completed by your authorized Crown dealer.

This includes the following maintenance items at 500, 1000, 1500 and 2000 hour intervals.

- Operational and Visual inspection of lift truck
- Check Fluid levels and add if necessary
- Engine break-in oil change at 500 hours
- Routine engine oil change
- Engine and Transaxle fluid and filter change
- Lubrication Points
- Air and Fuel System Checks including Filter replacement
- Ignition System checks including Spark Plug replacement
- Brake System checks
- Exhaust System checks
